

BioMedLex

INVITATION TO A PUBLIC DEBATE

The interdisciplinary association for Biomedical Law and Ethics **BioMedLex** (www.biomedlex.gr) is organizing on **Wednesday, June 12, 2024, 5 - 7 pm (CET)** an online public event on:

Neuro-Law: Criminal Justice and Neuroscience

The rapid advances in the study of human brain function in recent decades, thanks to the development of technology, have led to reflections on applications of this technology in the field of criminology and criminal law.

- Can criminal behaviour be predicted?
- How do we understand free will?
- How does technology affect criminal procedure and the prison system?
- Do technological developments lead to new human rights?

These are just some of the questions that will be addressed by our event's speakers, internationally recognised experts, with important contributions to an ever-expanding debate.

SPEAKERS

Federica Coppola, Assistant Professor, IE University Law School (Madrid)

“The Relevance of Social Neuroscience for Incarceration: Penological, Constitutional and Human Rights Perspectives”

Giovanna Parmigiani, Ph. D., Research Fellow, Department of Neurology and Psychiatry, University of Rome

"Application of Artificial Intelligence in Forensic Psychiatry and Criminal Justice"

Roberto Andorno, Associate Professor of Bioethics and Biomedical Law,
Research Fellow at the Institute of Biomedical Ethics, Faculty of Law, University of
Zurich

"Safeguarding the Privacy of our Minds: The Right to Mental Privacy"
